Q: React Router v4 parent route doesn't render when using a parameter I'm struggling with the rendering issues with React Router v4. In the below code I'm using a route to render a list of posts. But when the parent route is triggered I get a blank screen and it doesn't render the list of posts.

```
import React, { useEffect } from "react"; import axios from "axios"; import { withRouter } from "react-router-dom"; import Post from "../api/post/Post"; export default function AdminDashboard() { const [posts, setPosts] = useState([]); useEffect(() => { const fetchPosts = async () => { const response = await axios.get( "" ); setPosts(response.data); }; fetchPosts(); }, []); const postList = posts.map(post => ( {post.title} )); return ( Admin Dashboard {postList} ); } const Posts = ({ match }) => { const { params } = match; {params.id}
```
